

The next tide

Pelagic Labs / Expedition portfolio / Budget and review

FIELD DOSSIER EXPEDITION-PLAN / 01

One organization, six connected projects

Tideglass restores nursery plots. Lantern instruments the coastline.
 Atlas makes the evidence retrievable. Harbor keeps operations moving.

Community workshops and expedition logistics share the same calendar,
 project notes, task records and evidence review process.

\$180k

Planned allocation

6

Project workstreams

One vault

A shared source trail

Workstream	Plan	Purpose
Tideglass	\$48,000	Nursery and surveys
Lantern	\$36,000	Instruments and recovery
Atlas	\$28,000	Data and evidence
Harbor	\$24,000	Field logistics
Community	\$18,000	Workshops and access
Stewardship	\$26,000	Review and safeguards

The portfolio allocation totals 180000 dollars.

FIELD DOSSIER EXPEDITION-PLAN / 02

Track variance before committing spend

Budget figures are synthetic planning values rather than market forecasts.
The workbook separates planned, committed and remaining amounts.

A second market-style sheet demonstrates candlestick and OHLC charts.
Its values are a fictional equipment-price index, never a real investment.

Reallocate only after the project owner reviews the variance.

The price index is fictional and is not a trading signal.

Review zone: confirm sampling assumptions before approving expansion.
